

City of Seat Pleasant

Police Department

“A SMART CITY OF EXCELLENCE”

“Seat Pleasant offers Smart City Services that are better, faster and more personalized making it a City for me using information and communication technology, with the internet of things”

Department Name: POLICE

Date of Report: 09/30/2018

Reporting Period: August 2018

Summarize significant department progress for the reporting period that is indicative of providing services that are better, faster and personalized.

Our department continues to make strides towards a better, faster, more personalized Smart City approach using the internet of things. We are now working to ensure the internal structure, processes, and policies set over the last year or so are efficient in our service delivery to our residents and visitors. The department of public safety had the following notable events for the month;

- **August 4th** – The police along with other City departments joined Generals Future Charities for a “Community Youth Day’ in Goodwin Park, where they distributed with backpacks with school supplies to all youth in attendance. The department was able to showcase its “Smart Syder” motorcycles, provide safety pamphlets to citizens, and interact with the youth.
- **August 7th** – The department hosted its annual “National Night Out’ event in Goodwin Park which featured games, family entertainment, and free food. This event is hosted annually to help build the community-police partnerships.

Notable Criminal Incidents:

- **August 8th – Shooting/Homicide;** Officers were alerted to the 6600-block of Greig Street for a reported shooting. Upon Officers arrival they found an adult male suffering from multiple gunshot wounds. The victim ultimately succumbs to his injuries. The case was investigated by the Prince George’s County Police along with the Seat Pleasant Criminal Investigations Unit and the case has now been closed with an arrest.

Analyze department improvements that are needed and/or achieved based on the Smart City model.

Since the Police Department has a vast array of equipment used by the Officers daily to include on their person and within their vehicles it was essential to be able to report malfunctions. Within our new scheduling and employee management cloud software we were able to implement an equipment malfunction form. Officers can now logon to the system and report malfunctions with their equipment and vehicles. The system then automatically notifies the appropriate management team member via email for resolution. Once the issue has been resolved it is logged in the system by the management team member and becomes a permanent part of the equipment/systems history.

Identify goals for the next reporting period.

Goal: Begin the process of developing a City of Seat Pleasant specific general orders manual.

Goal: Preparation for the operations center.

Goal: Prepare for the police department expansion to include the temporary CGS operations center.
