

City of Seat Pleasant

Police Department

A SMART CITY OF EXCELLENCE

“Seat Pleasant offers Smart City Services that are better, faster and personalized making it a City for me using information and communication technology, with the internet of things”

Department Name: POLICE

Date of Report: 09/27/2017

Reporting Period: September 2, 2017 thru September 27, 2017

Summarize significant department progress for the reporting period that is indicative of providing services that are better, faster and personalized.

Our department continues to move towards a better, faster, more personalized Smart City approach using the internet of things. We continue to work on shaping our internal structure, processes, and policies to become more efficient in our service delivery to our residents and visitors.

- **On September 6th**, the department participated in the first day back to school for Prince George’s County Public Schools and Seat Pleasant Elementary. Officers and Command Staff were on hand to greet students and parents as they made their way to school throughout the morning. Officers were also strategically located throughout the community to ensure the safety and well-being of the students in busy intersections and crosswalks. The department deployed it’s electronic messaging board for the first time to remind drivers to “Slow Down Children in Area” and to welcome everyone back to school. Officers were on hand for both the morning and afternoon dismissal. The department will once again begin deploying officers to the school during the morning and afternoon times to assist the administration with keeping the students and staff safe.
- **On September 23rd**, the departments fleet coordinator took delivery of the last two remaining new patrol sedans. Most of the patrol division except for a few officers have been equipped with the new police sedans. These vehicles are equipped with some of the latest smart technologies to help us continue to move towards being a “Smart City”.

Notable Criminal Incidents:

- **No notable criminal incidents to report.**

Analyze department improvements that are needed and/or achieved based on the Smart City model.

Department property and asset tracking has been an on-going issue. Recently we embarked on the purchase of branded department asset labels which are numbered and barcoded. This allows us to tag all the police departments assets and property and track via an established database. With this improved asset management system, we can now know what we have on hand, serial numbers, expiration dates, current assignment location, and so forth.

Indicate problems identified, barriers encountered and solutions reached.

The department identified areas within the Code Enforcement Division with tracking vacant properties and code enforcement related issues. Over the past two to three months the department has been working with the City's vendor GovQA to develop a comprehensive database that will track these issues. The database will be accessible to all City staff and at a glance they can see issues related to any property or business as it relates to code enforcement or vacant properties. The system also auto populates the necessary documentation for violators to save on manual administrative hours for the Code Enforcement Division. This is an on-going development and should be live by October 12th.

Identify goals for the next reporting period.

Goal: Continue reviewing and rewriting the department's general orders.

Goal: Realignment of the Code Enforcement Division and processes.
